(54) Title: MESSAGE APPARATUS

(57) Abstract: The present invention provides an apparatus for treating an extremity of a body, the apparatus including a reservoir (2) adapted to contain a liquid (10), the reservoir wall having a cavity (4) adapted to receive the extremity of the body, wherein the wall of the cavity (8) is at least partially composed of a flexible material. The apparatus can be installed without connection to mains water or sewer, and allows for the saving of substantial volumes of water.
